Excel

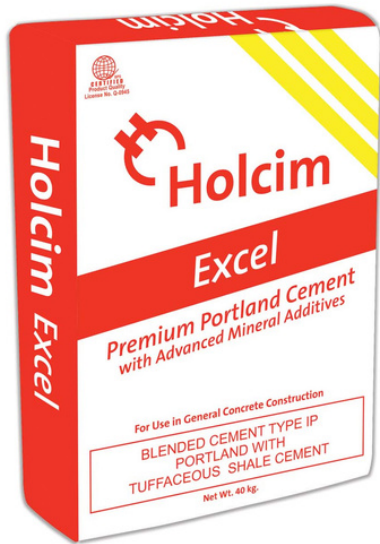

Premium Portland Cement
with Advanced Mineral Additives

Holcim

Excel

Holcim Excel is a Portland Cement with Mineral Additives complying to Type IP standard specifications as blended cement. It is designed to be a general purpose cement with specifications meeting the national and global standards.

Holcim Excel, as general purpose cement, is ideal for the following applications:

- Concreting of structural elements such as foundations, beams, columns and slabs of residential and commercial buildings
- Masonry applications
- Other concrete or mortar use such as walkways, pavements, drainage, landscaping element, etc.

Holcim Excel is ideal for these applications because of its better workability and its good compressive strength. It can also provide better durability to structures because of the advanced mineral additives added to it.
