

Holcim WallRight

Holcim WallRight is a Type S Masonry Cement conforming to ASTM C 91 standard.

Holcim WallRight is the ideal cement for masonry applications such as Hollow Block laying, filling and wall plastering.

ADVANTAGES OF HOLCIM WALLRIGHT

- Better adhesion of plaster to walls thus minimizing fall - offs and wastage of materials
- Better workability making plastering and finishing much easier and faster
- It is compliant to water retention specifications which helps control cracks caused by loss of water in mortar
- Smoother finish due to additive material used
