

Aqua X

2-in-1 blended cement with water repellent boosters

Holcim

Aqua X

The first 2 in 1 Blended Cement with Water Repellent Property in the Philippines

- ï Holcim Aqua X complies with **PNS/ASTM Specifications** for blended cement intended for masonry and general concreting applications
- ï It is made with **Active Water Repellent Boosters** which makes the mortar and concrete water repellent, preventing water seepage that may cause water damage

No need to add water repellent additive on site eliminating errors in dosage and mixing

With better protection against water damage, mortar and concrete made using Holcim Aqua X are more durable and will last longer.

BENEFITS:

- ï Structure is protected from damage brought about by moisture (seepage & leakage)
- ï Less repairs/rework
- ï Long-lasting structure and can withstand wet weather conditions
- ï No need to buy a separate admixture/compound
